==
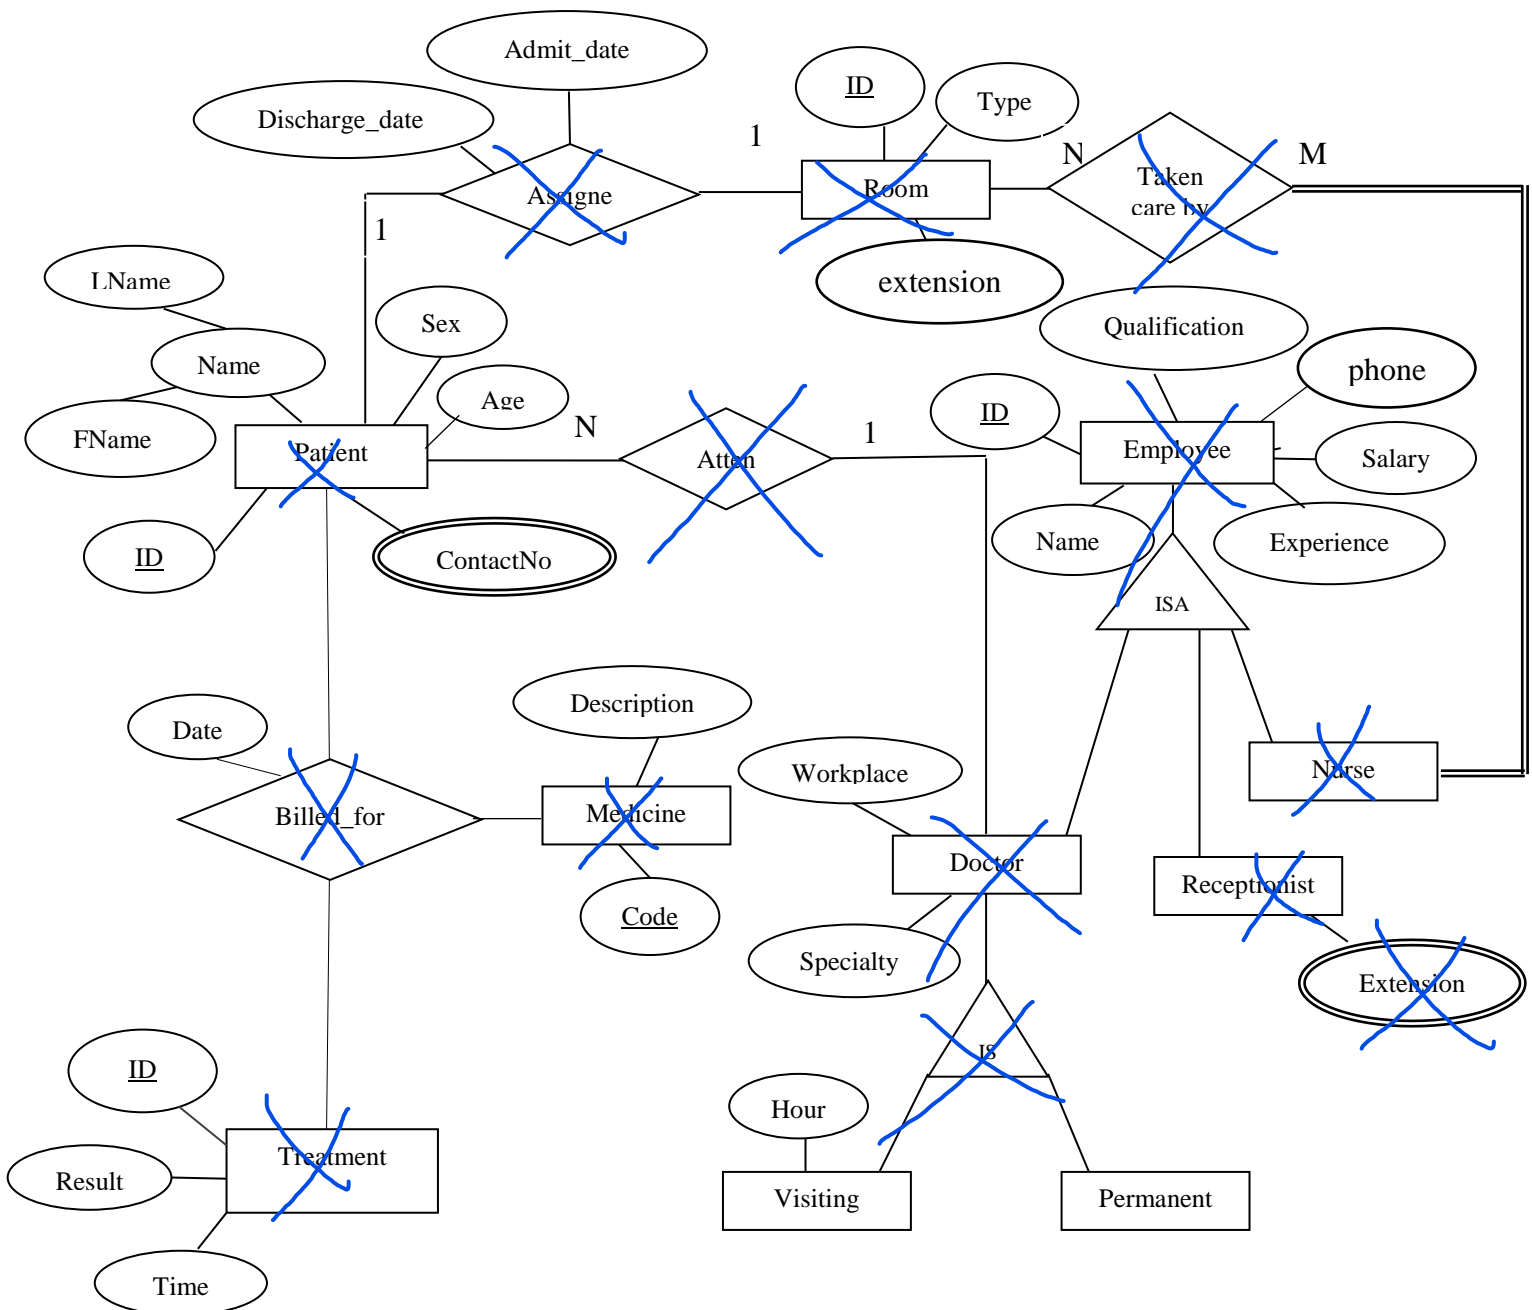

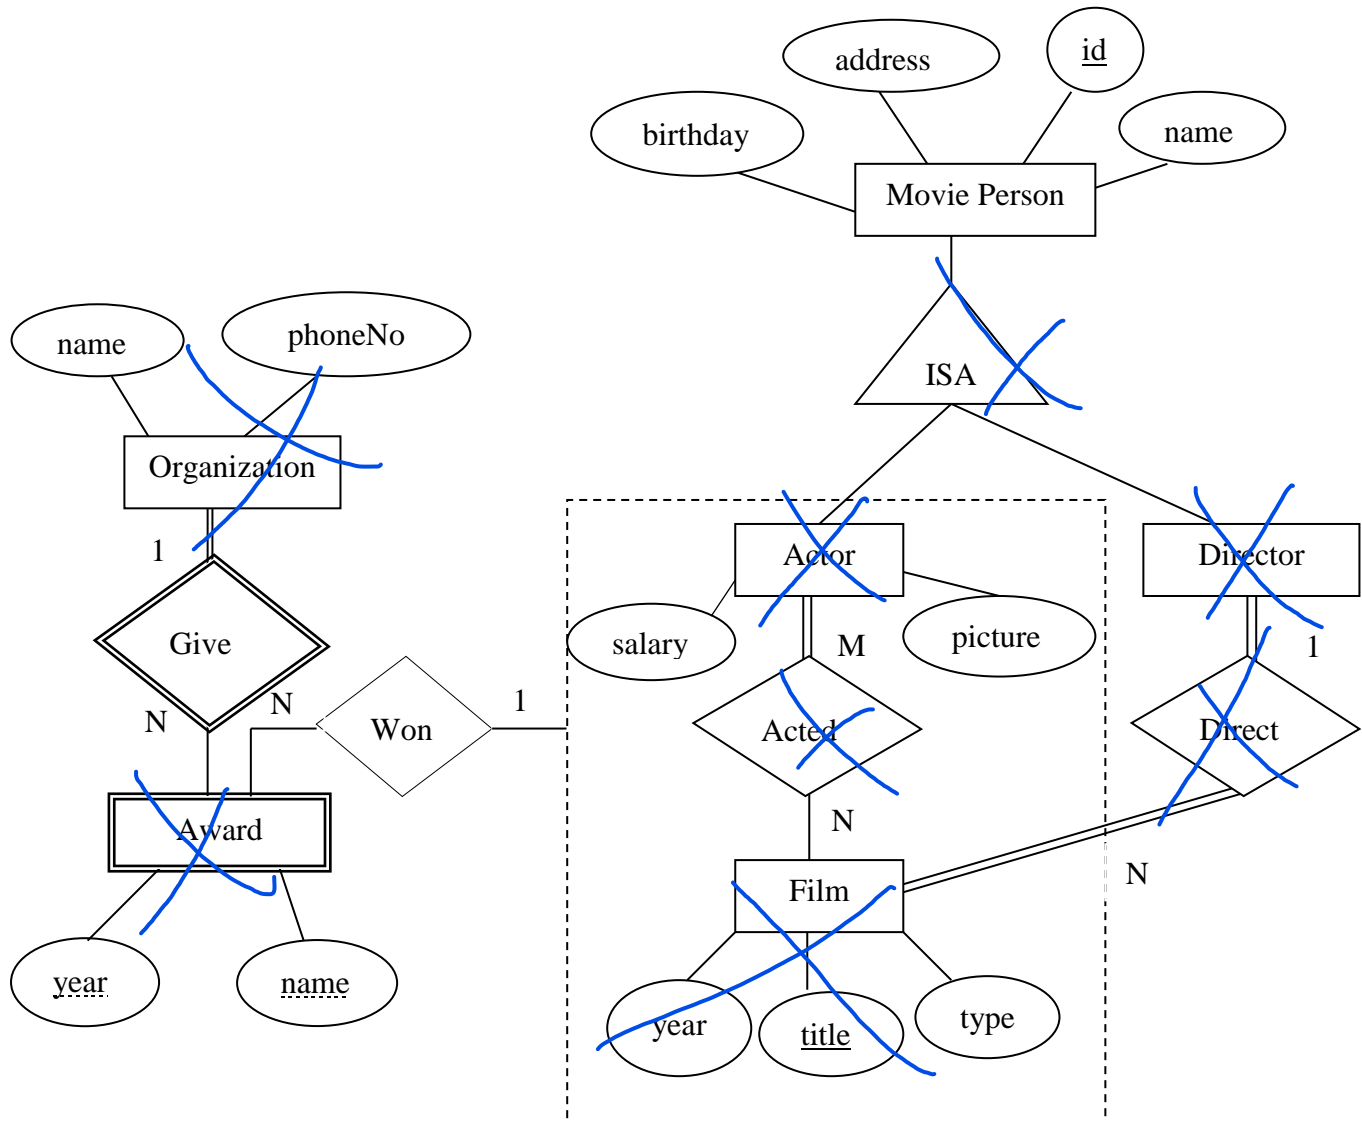

Learning outcomes:
- Identify different elements and constraints in an EER diagram
- Determine best option for mapping ISA hierarchies with different constraints
- Map a given EER diagram to the relation model

==

1. Convert the following EER diagram to the relational model. State any assumptions that you make.

2. Convert the following EER diagram to the relational model. State any assumptions that you make.

3. Convert the following EER diagram to the relational model. State any assumptions that you make.
